Career Objective

Career Objective Results-driven Infrastructure Practitioner with nearly 2 years of experience in technical support, system maintenance, and automation. Highly skilled in Infrastructure as Code (IaC), cloud infrastructure management, and L1/L2 troubleshooting. Seeking to apply automation and support expertise to maintain robust production and development systems.

Professional Experience

Tata Consultancy Services (TCS) | Associate – DevOps Engineer | Feb 2024

- Managed and automated cloud infrastructure using Infrastructure as Code (IaC) tools, primarily Terraform and Ansible, for automated provisioning, configuration management, and disaster recovery.
- Provided L1/L2 technical support for production and development systems, acting as a primary responder for incidents and performing intermediate-level troubleshooting and root cause analysis.
- Automated operational support tasks, runbooks, and system maintenance using Python and Shell scripting.
- Maintained and utilized real-time monitoring dashboards (Grafana, Dynatrace, Elasticsearch) to proactively identify, troubleshoot, and resolve system issues.
- Assisted in the implementation of technology at the OS-level by managing containerized microservices using Docker, Kubernetes, and Rancher.
- Engineered and automated CI/CD pipelines (GitHub Actions, Harness) to support reliable software deployments.
- Administered GitHub repositories, managing access controls, workflow automation, and repository governance.

Technical Skills

- **Infrastructure as Code (IaC):** Terraform, Ansible
- **Automation & Scripting:** Python, Shell Scripting, GitHub Actions
- **Cloud Infrastructure Management:** AWS, Microsoft Azure, Docker, Kubernetes, Rancher
- **Troubleshooting & Monitoring:** Grafana, Dynatrace, Elasticsearch, Azure Monitor, CloudWatch
- **Config. Management & OS:** Ansible, Linux Administration
- **Networking & Servers:** Knowledge of TCP/IP, DNS, SSL/TLS, Load Balancers
- **DevOps & Tools:** Harness, JFrog Artifactory, SonarQube, Git, JIRA, Postman

PROJECTS & INTERNSHIPS

SUVEN Consultants Pvt. Ltd. – Software Intern | Mar 2022 – May 2022

- Debugged and optimized backend logic in a collaborative Agile setup.
- Contributed to improving application performance and reliability.

Project: Cloud-Native Microservices Deployment

- Deployed microservices on AWS EKS using Docker & Kubernetes.
- Automated infrastructure provisioning with Terraform & Ansible.
- Built CI/CD pipelines using Jenkins, GitHub.
- Monitored workloads with Grafana & Dynatrace, achieving 99.9% uptime.

BE Project: Centralized Access & Tracking System for College Educators

- Designed an ERP- system to track student internships, job placements, and academic progress.
- Integrated geolocation tracking for teachers and automated workflow management for students.
- Built dashboards and backend services using .NET for efficient administration and reporting.

Diploma Project: Fingerprint & Face Detection-based Voting System

- Developed biometric authentication using Python OpenCV for secure voting.
- Implemented face & fingerprint detection with real-time validation and fraud prevention logic.

Education

- **Savitribai Phule Pune University** — *B.E. Computer Science*
  Jan 2020 – May 2023 | CGPA: 8.34
- **Pravara Polytechnic College, Loni** — *Diploma in Computer Engineering*
  Jun 2016 – Oct 2019 | 75%

Certifications

- **AWS Certified Solutions Architect – Associate (SAA-C03)**
- **GitHub Copilot Fundamentals – GitHub**
- **AZ-104: Microsoft Azure Administrator**
- **DP-900: Azure Data Fundamentals**
- **AI-900: Microsoft Azure AI Fundamentals**
